emDEX ©

- *embedded indexing for FrameMaker™ as it was meant to be*
- *for Windows 98/NT/2000/XP*
- *compatible with FrameMaker™ 5.5, 5.5.6, 6.0, and 7.0*

emDEX 2.0 is a *FrameMaker™ Plug-In*

Watch your index grow right before your eyes in Real Time with **emDEX**'s visual indexing feature.	Keep track of and modify your index entries **on the fly** - *no more tag-and-generate again and again.*

- Sizeable marker edit window with user-defined formatting buttons
- Real-time visual updating of the **emDEX** index window **WHILE MARKING ENTRIES** - view and modify entries as you go
- Real-time formatting of locators and *"See"*, *"See also"* references
- Visual index creation for single documents or books
- Global search and replace
- One-step range marking by highlighting text

Demo version of emDEX has full capabilities of the full program but is limited to 100 entries.
